

POWER SMOKER™ 2

Engineered for Performance

HURCO Technologies provides the right tools to make your low visibility training efforts safer and highly productive.

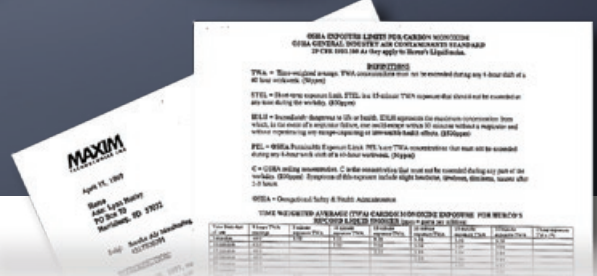

(Patent #6865341)

HURCO
TECHNOLOGIES, INC.®

Power Smoker 2

With the Power Smoker 2, your fire crews can train with the confidence of knowing they are using a laboratory tested safe smoke.

PERFORMANCE COUNTS

- Safe and highly productive smoke generation for low visibility fire training.
- Cost effective, the patented Super Jet™ creates large volumes of smoke with very little waste.
- Laboratory tested LiquiSmoke® was tested by a major university for 107 known toxic compounds and was found safe and clean.
- LiquiSmoke® does not contain Zinc Chloride, the active ingredient in smoke bombs. Zinc Chloride is a toxic compound that is dangerous when inhaled.
- Light weight and easy to handle.

LiquiSmoke® Laboratory Tested Safe

Tested for:

- 107 known toxic compounds
- Carbon monoxide levels
- Staining and odor

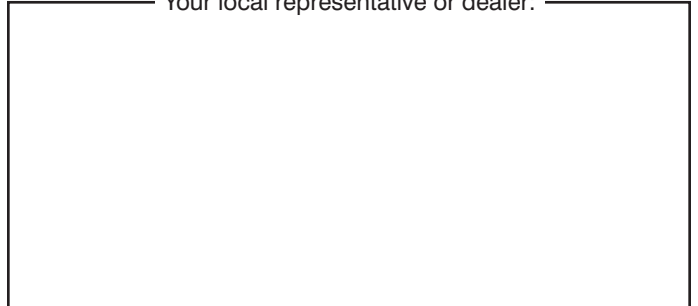

The Results Are:

Safest and cleanest way to smoke test
